

## PDF/GUI print prerequisites

---

This checklist identifies all of the additional Linux configuration requirements needed for this feature. These requirements are in addition to the requirements for the basic Fitrix installation which are listed separately. Please note that detailed instructions are not provided for these Linux systems administration steps. Please consult your Linux documentation or contact your Fitrix sales representative if you want assistance with these.

### **Required:**

- PHP 5.1.x or higher
- Apache Web Server 2.x or higher

### **Optional:**

- RedHat Network (RHN) login if using Redhat distribution.
- Development system if compiling packages for source:
  - Compiler (gcc), libraries, and development utilities (GNU Binutils)

To confirm that these prerequisites are met, please download and run our checkout script “pdf\_gui\_print\_preinstall\_checkout.sh” on your Linux server. The checkout script is located in the support area of [www.fitrix.com](http://www.fitrix.com) under “Fitrix PDF/Graphical Printing implementation”
