Fitrix ERP Delivers:

The features and capabilities you need for manufacturing

- ˝ Visibility into your inventory
- ˝ Visibility into your supplier relationships
- ˝ Visibility into your business
- ˝ The tools you need to manage your inventory
- ˝ The tools you need to get new products out faster
- ˝ The tools you need to shorten supplier lead times
- ˝ The ability to add features you don't yet know you need to avoid getting boxed in as you develop new products

A Robust ERP system with the capabilities you need, at a price you can afford

- ˝ A proven solution for small and medium sized manufacturers
- ˝ A fully integrated end to end ERP system with a unified technology
- ˝ Host Fitrix in the Cloud (we host it) or on Premise (you host it)
- ˝ Choose between a full ERP implementation or phase in one component at a time
- ˝ Scale from a few users to hundreds as your business grows

More Accurate Data
‰Since transitioning to Fitrix, our error rate has dropped by between 30 and 40 percent.+
- Brian Grellinger, Director of IT, Doosan Infrascore

Fitrix Rapid 90 Day Implementation Program:

- ˝ Proven program on how to go live with Fitrix in 90 days
- ˝ Focus your team intensely for 90 days, then begin reaping the benefits of a modern ERP system targeted to small and medium sized manufacturers
- ˝ Greatly reduces the risk of stalled implementations and scope creep that impacts deadlines and budgets
- ˝ Readiness plans and tests help ensure your cutover is smooth
- ˝ Users can be trained once and then stay current with the software
- ˝ 90 days assumes no custom features, add 30 days for limited customizations

Fitrix Pricing Models:

To view our pricing models for both in the Cloud (we host it) and Premise (you host it) please visit our website.

Fitrix Support and Services:

Fourth Generation Software offers a comprehensive range of services to help you successfully implement Fitrix ERP software. Whether you're very self-sufficient and have the resources in-house to manage your entire implementation, or you're in need of lots of hand-holding over the course of the project, we're ready to address your services needs with the resources you'll require. Our software support package is available for help desk and product updates. All other services are a-la-carte and billed at an hourly rate, including:

- ˝ Detailed needs analysis
- ˝ Implementation project management
- ˝ Implementation assistance
- ˝ Data conversion assistance
- ˝ Training
- ˝ Software installation and configuration
- ˝ On-Site Go Live assistance
- ˝ Custom software feature design, development, implementation

Comprehensive Inventory Management
%Fitrix allowed us to cut down on our inventory, it probably cut it in half+
- John Maydonovitch, CEO of electronics contract manufacturer MCE, Inc

Extending the Capabilities of Fitrix:

Fitrix is designed as a ready to go out of the box solution for small and medium sized manufacturers but if you have unique business requirements Fitrix can be extended under the following programs:

Planned Fitrix Feature Releases and Updates:
- ˝ We are continually adding new features to Fitrix to keep the product up to date and respond to our market

Fitrix Feature Program:
- ˝ We will add unplanned product features to Fitrix that you need if we determine they will also benefit other customers (fees may apply)

Customizing Fitrix:
- ˝ Fitrix can be fully customized via source code by our team or by your team if you have custom business requirements
- ˝ Your Fitrix software remains fully supportable
